

Debris Box Sizes

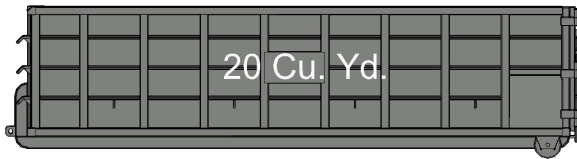

Size Matters! Choosing the right size debris box is important. Opting for a debris box that too small for the job will require extra services and costs.

14 Ft. Length x 8 Ft. Wide x 2 Ft. Height

7-CUBIC YARD BOX

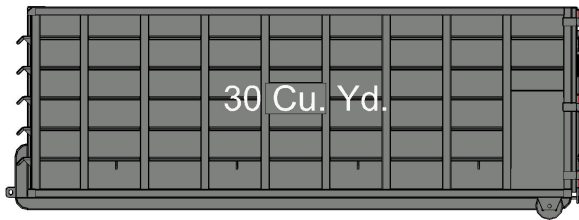

Used for junk removal, very small renovation projects and the removal of dirt, sod, brick, rock, cinder block, asphalt and concrete.

18 Ft. Length x 8 Ft. Wide x 4 Ft. Height

20-CUBIC YARD BOX

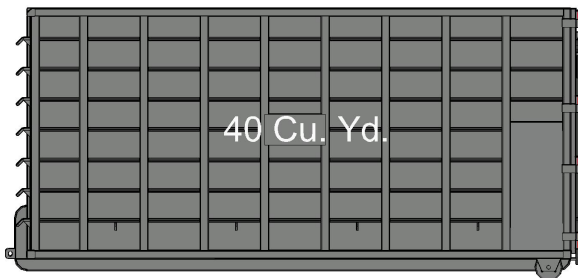

Used for larger-scale projects such as large attic, shed, basement, and garage cleanouts; large bathroom or kitchen remodeling or renovation; and removal of large amounts of construction and demolition material.*

18 Ft. Length x 8 Ft. Wide x 6 Ft. Height

30-CUBIC YARD BOX

Used for major projects to dispose of large amounts of construction and demolition material*, large garage and home renovations or additions, new home construction and large structural builds and whole-house clean-outs.

18 Ft. Length x 8 Ft. Wide x 8 Ft. Height

40-CUBIC YARD BOX

Used for large renovation, remodeling, construction projects, roof tear offs and replacements, siding disposal, large construction and demolition jobs* and commercial clean-outs.

***Please note: disposal of heavy materials, such as dirt, sod, brick, and concrete, are limited to the 7-cubic yard box size.**
